Belt Driven Wheeled Compressors

The compressors with single and two stage, single and two cylinders are equip with three phase and mono phase (up to 2HP) electrical motors and V-Belt driven Wheeled compressors (50/100/130 litre) are equip with pressure switch, safety valve, manometer, non-return valve, condensate drain cock, main tap and pressure regulator in addition to stationary types.

The stationary types with two, three cylinder and 5,5 and 7,5 HP electric motor are also equip whit the rmal switch for motor protection. The working principle of the compressors are as start-stop and unloaded start is provided by automatic drain on pressure switch.

Single Stage Air Piston Compressors

Model	Working Pressure (Bar)	Piston Displacement (lt./min.)	Motor Power		Voltage / Phase (Volt)	Tank Volume (lt.)	Round Per Minute (Rpm)	No. of Stage	No. of Cylinder	Dimensions (W x L x H)	Gross Weight (kg.)
			kW	HP							
11-50	8	110	0,75	1	380/3	50	980	1	1	50x88x83	60
