**INTERPUMP** branded pumps with three cylinders and ceramic pistons are employed in the **CALYPSO** High Pressure Washer.

Regulators with bypass system are employed in these pumps, thus providing **maximum performance** and required safety.

Thanks to the regulators used, the pump is provided with a **longer service life** as the chemical flow does not take place within the pump.

Power transmission is direct coupling and thus loss of power and vibrations are **minimised**.

Chemical tank used in hot and cold models has a capacity of **7 litres** and the capacity may be increased by the user, optionally applying a secondary tank.

Thanks to the specifically designed burner used, water temperature may be set between **30°C and 120°C** in hot type pressure washing machines.

While Calypso High Pressure Washer offer consumers more economical solutions thanks to their simplified special design, Calypso is a brand of AYDIN TRAFÖ and manufactured at **AYDIN TRAFÖ** facilities.

Hot type washing machines equipped with a **17 l.** fuel tank consumes **3 l. to 5 l.** diesel oil per hour, depending on the desired water temperature.

## Hot Models

Model	Working Pressure (Bar)	Capacity (lt/dak)	Motor Power		Voltage / Phase (Volt)	Fuel / Energy Source	Water Temperature	Weight (kg.)	Dimensions (W x L x H)
			kW	HP					
<b>CSC-150M</b>	150	11	3	4	230/1	Motorin (Diesel)	30-120 C	128	77x110x82
<b>CSC-200/7,5</b>	200	15	5,5	7,5	400/3	Motorin (Diesel)	30-120 C	140	70x110x82
<b>CSC-250</b>	250	13	5,5	7,5	400/3	Motorin (Diesel)	30-120 C	144	70x110x82
