

C & R TESTING LTD

Gasoline and Diesel Pressure Washing Machines

Using regulators with bypass systems, these pumps are provided with **maximum performance and necessary safety**.

As chemical flow does not take place within the pump thanks to the regulator used, pump has **a longer service life**.

Capacity of the detergent tank is **7 litres**.

In order to obtain a higher performance, world class gasoline Honda and diesel Lombardini motors are used. Both motors are available in types started with either a cord or an automatic starter.
